PROJECTS

Bach Khoa Tutor Support System *(September 2025 - now)*

- Resolved UI/UX inconsistencies and logic bugs using CSS and TypeScript, ensuring perfect implementation against design mockups.
- Reviews and debugging to maintain high code quality and reduce visual defects
- Designed technical diagrams to visualize system architecture and feature workflows.
- Create mannual test scenarios.

CSE Job Posting Website *(June 2025 - now)*

- Built responsive user interface with PHP, CSS, and JavaScript.
- In charge of full development life-cycle: planning, design, implementation, testing, and deployment readiness.

My Portfolio Website

- Built an end-to-end personal portfolio website from design to production deployment.
- Applied UX/UI principles to deliver a clean, intuitive, and user-centered experience.
- Optimized website performance with responsive design, efficient asset loading, and SEO-friendly structure.
- Deployed and maintained a production-ready website with custom domain configuration.
